**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

# Office Action Summary

**Application No.**

10/735,517

**Applicant(s)**

ECKSTEIN ET AL.

**Examiner**

CARLTON V. JOHNSON

**Art Unit**

2436

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 20 April 2010.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1,3 and 5-10 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1,3 and 5-10 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/22)
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date: \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_
- Paper No(s)/Mail Date: \_\_\_\_\_

**DETAILED ACTION**

1. In view of the Advisory Action filed on 4/20/2010, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.
2. Claims **1, 3, 5 - 10** are pending. Claims **2, 4** have been cancelled. Claims **1, 3** are independent. This application was filed on 12-11-2003.

***Response to Remarks***

3. Applicant's arguments have thus been fully considered and they were persuasive, therefore new grounds of rejection have been entered.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims **1, 3, 6 - 10** are rejected under 35 U.S.C. 102(e) as being anticipated by **Kocher et al.** (US Patent No. **6,327,661**).

**With Regards to Claim 1**, Kocher discloses a method of preventing the external detection of operations in a digital integrated circuit (see Kocher col 3, line 63 - col 4, line 5: technique of using unpredictable information to protect cryptosystems against external monitoring) comprising an asynchronous circuit (see Kocher col 9, lines 3-9: asynchronous receiver/transmitter) comprising time-varying a supply voltage of said asynchronous circuit, by a random number generator, to time-shift the execution time of operations within said asynchronous circuit; wherein the time variation of said supply voltage takes place in a random way. (see Kocher col 5, lines 22-29: sink power (varying power consumption, supply voltage) to introduce noise; col 4, lines 37-50: randomness source (random number generator) creates noise used to generate unpredictable information)

**With Regards to Claim 3**, Kocher discloses a digital integrated circuit comprising: an asynchronous circuit (see Kocher col 9, lines 3-9: asynchronous receiver/transmitter), and means for time-varying a supply voltage of said asynchronous circuit to time-shift the execution point of operations within said asynchronous circuit, wherein said means for time-varying said supply voltage comprising a random number generator. (see Kocher col 5, lines 22-29: sink power (varying power consumption, supply voltage) to introduce noise; col 4, lines 37-50: randomness source (random number generator) creates noise used to generate unpredictable information)

**With Regards to Claim 5**, Kocher discloses the digital integrated circuit according to

claim 3, wherein said means for time-varying said supply voltage comprises a noise voltage source driving said random-number generator. (see Kocher col 5, lines 22-29: sink power (varying power consumption, supply voltage) to introduce noise (noise voltage source))

**With Regards to Claim 6**, Kocher discloses the digital integrated circuit according to claim 3, wherein said means for time-varying said supply voltage further comprises a digital-analog converter transforming the digital values produced by said random-number generator into an analog voltage. (see Kocher col 4, lines 58-67: output converted to digital form using digital/analog converter)

**With Regards to Claim 7**, Kocher discloses the digital integrated circuit according to claim 3, wherein said means for time-varying said supply voltage further comprises a voltage regulator. (see Kocher col 5, lines 22-29: activation controller enables noise production system, configured to sink power (varying power, regulation of power or voltage))

**With Regards to Claim 8**, Kocher discloses the digital integrated circuit according to claim 3, wherein said asynchronous circuit is formed for executing a coding algorithm. (see Kocher col 4, lines 37-50: random number generator implemented in software (coding))

**With Regards to Claims 9, 10**, Kocher discloses the method, digital integrated circuit according to claims 1 and 3, wherein the asynchronous circuit is a type, which performs processing without correlation to a clock. (see Kocher col 6, lines 18-21: clock skipping (clock decorrelation, without correlation to a clock))

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carlton V. Johnson whose telephone number is 571-270-1032. The examiner can normally be reached on Monday thru Friday , 8:00 - 5:00PM EST. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nasser Moazzami can be reached on 571-272-4195. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
